

Closure For Bevel Seat

Standard Dairy threaded/bevel seat plastic closures and caps for sanitary pipelines, tankers, and flow-line equipment. The main purpose of using pipe caps is to waterproof the connections. These tough plastic cap nuts seal open ends and shut out contamination, dust, insects, mold and odors. Tightens drip-proof by hand. Available in both male and female connections and with or without a stainless steel chain. Now featured in 3 colors: Red, White, and Black. If you have any questions about this product or would like to place an order, please call L.C. Penner Company. Designed to protect the ends of threaded and non-threaded tubing, will fit diameters from 1.5" to 3".

Penner Closures are made with lightweight, high impact plastic:

- Tighten drip proof by hand.
- Have optional standard sanitary dairy threads.
- Male and Female sizes 1 1/2" through 3".
- Replace metal closures at half the cost.
- Thousands in use nationwide.

1.) Female:

- With Chain
- With Out Chain

2.) Male:

- With Chain
- With Out Chain

Clamp Type Closures:

Our gray Clamp-Type Plastic Closures feature a unique anti-slip grip for easy opening or closing. These Clamp-Type Plastic Closures are great for clamp type fittings or flow verters.

Tri-Clamp Dust Caps:

Tri-Clamp plastic dust caps for clamp type fittings and pipe ends. These inexpensive snap-on dust caps protect sanitized pipelines and flowline equipment from dust, contamination, insects, and mold. They are available in Red, White, and Yellow, and with or without stainless steel chain.
